Sounds good Kim. I will make sure that everyone is onboard with these requests and observations.

Okay. I'd like to get this approval routing for signature no later than Tuesday.

Also, I didn't get the revised contractor work plan. If I don't have it by Tuesday, I will just include its submittal as a condition of the Approval. Also, just as an aside, I did review the CWP that Bill provided to me with the revised April 3 SIP. I did not that there is no discussion of decontamination of non-porous surfaces (ie, structural metal beams, sills, door frames, etc). Albeit there is discussion of decon of porous surfaces prior to encapsulation.

As such, please insure that you let the contractor know this (decon of non-porous surfaces) so that it can be included in the work plan. It should also note that the decon that is proposed for the window sills will occur within each work zone, as we discussed, unless there has been a change to this plan.

Hi Kim,

I spoke with Tom Burns at Leominster (WT Rich). He indicated that no one has touched any of the soils since they have been on site. They did some drain work adjacent to the area but not at the window area itself.

I hope that helps.

Have a nice Easter.

Regards,

---

**Glenn Nelson**
